INTEGRATION OF RCRA FACILITIES INVESTIGATION/REMEDIAL INVESTIGATION (RFI/RI) DATA  
AND ALL ENVIRONMENTAL DATA - JMK-0649-92

Ref: J. K. Hartman ltr, (6628) to J. M. Kersh, Final Phase I RFI/RI Work Plan for Operable Unit No. 9,  
June 15, 1992

In the Department of Energy/Rocky Flats Office (RFO/ DOE) letter of June 15, 1992, EG&G Rocky  
Flats, Inc. (EG&G) was requested to respond in writing by July 17 regarding actions taken to ensure  
the integration of RFI/RI data and other sampling data. This letter will serve as that response.

EG&G has always made a priority of integrating the sampling plans between adjacent or overlapping  
Operable Units (OUs), as well as incorporating any appropriate data from routine monitoring programs.  
The result of this effort has been a streamlining of some sampling, elimination of duplication of efforts,  
extraneous cost avoidance and an overall consistency of programs.

An example of EG&G's efforts at integration include the joint environmental evaluation work  
completed on OU 1, 2 and 5. Another example of on-going integration is the sections in all recent  
workplans (see OU 12, 13, 14) on impacts from other OUs and discussion of existing data. These  
sections utilize data sets from all adjacent areas as well as sitewide and background studies. OU 5 and  
6 have both incorporated ongoing surface water and sediment data and sampling sites to streamline  
the sampling efforts in those areas and avoid duplication. A fourth example is that the on-going air  
monitoring data has been used to fulfill the air monitor requirements for both OU 1 and 2.

EG&G program managers are cognizant of the value of integrating data between programs and will  
continue to emphasize this as an issue of highest priority.

J. M. Kersh, Associate General Manager  
Environmental and Waste Management
